

HEGEDŰS KATALIN

Jankó János Általános Iskola és Gimnázium

Tótkomlós

Tesztsorozat angol nyelvből a 4–8. osztályosok számára

To the Teacher:

All the tests are written on two sheets. They are for the 4th, 5th, 6th, 7th and 8th forms (two lessons a week). These tests are planned for 45 minutes. The score can be 100 points. There are 10 questions for everybody, and five minor questions in each of them. If the written answer is correct and the spelling is good, they can get two points. If the answer is good, but the spelling isn't, they can get one point.

The "Match the pairs" exercises are worth one point only, so there are ten pairs to make ten points in these tasks, too.

How can we give a mark?

Score: %	Mark:
0- 25	1
26- 52	2
53- 70	3
71- 86	4
87-100	5

You can give percents only instead of the marks just to see the end result. I hope these tests aren't too difficult.

My best wishes to you

4. osztály

Tests for children in the 4th form of the elementary school 2 lessons a week

1. Pótold a hiányzó szavakat!

This a book.

I a boy.

We hungry.

 I into the bathroom.
 I breakfast in the kitchen.
 I a sandwich.
 I tea.

NANSZÁKNÉ DR. CSERFALVI ILONA
 Kölcsey Ferenc Református Tanítóképző Főiskola
 Debrecen

Iskolakertjeink a nevelés szolgálatában

Tudunk-e több ajándékot adni sérülékeny Földünknek, mint a természetet ismerő és óvó gyermekek generációját? Vizsgálatok bizonyítják, a gyermekek a tapasztaláson keresztül tanulnak a leggyorsabban. Ez a tapasztalás adja a további tanulás, a megismerés keretét, melyet a tanár vagy a felnőtt segít, bátorít, inkább mint irányít. A szabadban szerzett esztétikai, érzelmi élmények nagyon fontosak, mint például a fa megölelése, kincsvadászat nagytóval, a hangok, a levelek hullásának megfigyelése, a kert látogatóinak etetése, csúszó-mászók futóversenye, adatgyűjtés a kertben, mérések, számlálás, osztályozás, feljegyzések készítése a tapasztalatokról, az idő, az évszakok figyelése, hópehely-készítés, zacskó, üvegház, növényprés készítés, csipések és szívasok, madáretető ötletek, stb. Mindezek segítik egyúttal azt is, hogyan kérdezzenek, kutassanak, és hogyan reagáljanak a gyerekek a körülöttük lévő világra.

Külföldi tanulmányutamon tapasztaltam, hogy az ökológiai kert miként segíti a tanulók ismeretszerzését. Az iskolakertekben a különböző dolgok változásait figyelhetik meg a tanulók. Itt különféle állatok és növények találhatók, a leggyakoribb növények mellett a különféle gyógynövények is, mint a levendula, bazsalikom, kakukkfű, citromfű. Ezen kívül felfedezhetünk itt gabonaféléket, különféle gyakorló területeket, amit a gyermekek maguk gondolnak. A melegebb éghajlatot igénylő
