

ROCHE DIAGNOSTIC SOLUTIONS IN FORENSIC LABORATORIES

Apáti Sándor

*Roche (Magyarország) Kft.
2040 Budaörs, Edison utca 1.*

Roche (Hungary) Diagnostics division has been successfully working together in many areas both with Hungarian healthcare and life sciences partners through its high-quality products. With adequate and competent IT resources and technical solutions, our products can provide quick and reliable high-quality results that guarantee quality assurance and patient safety. These equipment support modern diagnostics and help increasing the security of modern targeted therapies in Oncology care at all leading Hungarian Medical Universities, major public hospitals, molecular laboratories and pathologies. Roche Diagnostics has a key role in building long-term cooperation with domestic manufacturers. Implementation of Belux voice recognition and dictation software's pathology module is one example that was arranged within the framework of such cooperation.

The presentation provides a brief overview of Roche Diagnostics' products which could be implemented in your forensic science laboratory.

Subsequently the Belux voice recognition and dictation system is presented, which includes a forensic module currently under development by the Department of Forensic Medicine, at the University of Szeged.
