MEMORIES IN PICTURES

Janos Herczeg in 1982 has been invited to attend Microsurgery Training Course here in San Francisco at our Institute:

<http://moetinstitute.com/>

During his training Professor Laszlo Lampe was also visiting here, and we decided to organize a series of Microsurgical Training Courses in Hungary to help gynecologists to get hands-on teaching in this highly specialised field.

That came into reality as the first and unique high-tech training at Hungarian Universities in Szeged, Budapest and Debrecen.

This landmark successful teaching was our joint achievement with Janos and to remember this, I collected some pictures on our work, even pictures of the Florentine Microsurgery Workshop, at which Janos also participated upon our invitation.

Dear Janos !

I wish you many more years with happy work and fulfillment. Enjoy the pictures below, that I collected for you.

presents:

3°

FLORENTINE

MICROSURGICAL WORKSHOP

the state of the art in vascular and nerve reconstructive microsurgery

Ospedale Misericordia e Dolce (U.S.L. 9 Area Pratese) - Prato

Supported by: Regione Toscana / Comune di Prato / Cassa di Risparmio - Prato / Accademia Sanità Militare - Firenze

Represented Universities and Departments: Indiana University, University of Kentucky, Tulane University, University of California, University of the Pacific, Szent-Gyorgy Albert Medical University (Szeged), Postgraduate Hand Surgery School (Director: G.E. Jacchia M.D.) Florence University, Dept. Neurosurgery U.S.L. 10 D - Florence.

Course Directors: ZOLTAN SZABO, Ph.D., F.I.C.S. (Microsurgical Research Institute - San Francisco)
LUDOVICO STELLINI, M.D. (Istituto Ortopedico Toscano - Firenze)

& Internationally Renowned Faculty: JAMES B. STEICHEN, M.D. - BUFORD H. BURCH, M.D. - JANOS HERCZEG, M.D. - MICHELE D'ARIENZO, M.D. - ROLANDO GAGLIARDI, M.D.

Instructional lectures: operating under optical magnification, eye-hand coordination, the magic knot of microsurgery, peripheral nerve microanastomosis, end to end, end to side, interposed graft anastomosis techniques and basic principles.

Clinical topics: reconstructive microsurgery of the upper extremity, revascularization of the lower extremity, the esophageal reconstruction.

For information: Wanda Toy, Program administrator, Microsurgical Research Institute, 153 States Street, San Francisco, CA 94114 (USA) phone (415) 626-3400.

With Dr. Ludovico Stellini, a hand surgeon with the Ospedale Misericordia e Dolce, the Microsurgical Research Institute also organized and taught a series of four microsurgery workshops in Prato, Italy from 1987 to 1991.
